

- 1) Sachin = hello, good evening Kushan. I'm sachin.
- 2) **Kushan= Good evening**
- 3) Sachin= how are you doing today Kushan?
- 4) **Kushan= I'm doing well and I'm fine**
- 5) Sachin= Kushan, could you please give me a introduction about yourself?
- 6) **Kushan=I'm Kushan Dimantha. I had completed my internship at nextmatrixlab. It's an IT company that design web applications and mobile application. So now I'm looking for new job opportunities in the industry and therefor I always tends to use this website to search new jobs and maintain my online CV.**
- 7) Sachin= have you found a job through this site
- 8) Sachin= okey. looks like you have good experience about the website. Can you please login to the site by using job seeker login.
- 9) **Kushan= okey give me a second(go to login page)**
- 10) Sachin= Kushan, what do you think about this login page?
- 11) **Kushan= I think the colors are okey. but the user friendliness is not there. The login page should be in the center of the webpage and the font size should be maximize. And I also I didn't like where the register button is located.**

- 12) Sachin= okey Kushan. Now please login as job seeker and go to home page. And tell me what you think about the interface?
- 13) **Kushan**=Yeah, sure. Okey this is the job seeker homepage. I feel like it's so messy an large part of page looks empty. the description given in the page is not related to my personal profile
- 14) Sachin=okey Kushan. Please tell me what are the expected things to be changed in this interface.
- 15) **Kushan**= first thing is the logout button. It's difficult to find the logout button. It's gives a bad user experience and there is a popup saying click to built your resume. It should be changed and also the three forms and form color should be changed to light color than the page background color.
- 16) Sachin= what about the table in the bottom of the site?
- 17) **Kushan**= it's looks okey to me. inside of the data table should be lighter than the web page. And also the footer must be changed in attractive way.
- 18) Sachin= okey Kushan. Can you please click that click to built button and tell me some thing about the interface.
- 19) **Kushan**= the form color look good to me. but the text fields and filling fields are not aligned correctly. for the preferred countries field it's better to use dropdown list. And the save button should be bit large. It's difficult to read the content inside button.

20) Sachin= okey Kushan. The interview is done. I had very good informative session with you. Your information would be very important to us.

21) **Kushan**= thanks for giving me this chance. there is lot of areas in this website that can be developed. In my opinion this is a important website for job seekers. The functions are really good. The only problem is the user interfaces. I think my answers will help to you as developer.

22) Sachin=yes, it's a great help for us too. Thank you for joining today Kushan.

23) **Kushan**= Thank you.
